## **EXTERNSHIP / JOB OPPORTUNITY**

Brookside Animal Hospital is the third longest continuous running hospital in Texas. We have been providing care since 1955. Brookside is an established small animal general practice that also sees exotic animal species. We're in a small town that is 30 minutes South of the DFW metroplex. Our clinic sits on 22 acres. We have a separate boarding facility, a barn, stalls, cattle chute, and pens. We do not currently have large animal practitioner, but we have the facilities to accommodate large animal work in the future.

We have two full-time veterinarians, and a one part-time. We are seeking to hire full-time veterinarians to our practice. The community is growing, and we would like to grow with it.

We provide high quality veterinary medicine. Brookside has full IDEXX in house laboratory, digital radiology, handheld digital dental radiographs, three ultrasound machines including one ultrasound capable of providing cardiac workups and one for large animal reproduction, surgery suite, full anesthetic monitoring, TonoVet, cold laser, rhino-scope, all hydraulic lift tables, video otoscope, video microscope, dental table, and we perform minor orthopedics currently.

In the future we plan to continue obtaining the latest veterinary equipment. Goals for the next year are to acquire a gastroscope, CO2 cutting laser, and specialty equipment for exotic animal medicine. We plan to provide our patients with more advanced orthopedic surgeries, and chiropractic management.

Brookside strives to provide a phenomenal work-life balance. We are hiring for a 4-5 day work week, NO WEEKENDS OR AFTER HOURS EMERGENCIES REQUIRED.
